JOURNAL OF OPTIMIZATION THEORY AND APPLICATIONS: Vol. 25, No. 4, AUGUST 1978

Subject Index to Volume 25

Algorithms, 125
Applications to economics, 383
Assignment problem, 361
Asymptotic cones, 459

BFGS algorithm, 507
Banach spaces, 585
Bang–bang controls, 549, 563
Bayes' rule, 247
Bolza problem, 57

Calculus of variations, 519
Choice of endpoints, 383
Closure theorems, 555
Computational efficiency, 247
Computational methods, 383
Cone of directions of constancy, 451
Cones of constancy, 161
Cones of decrease, 161
Conic control constraint, 117
Conjugate directions, 11
Connected level sets, 579
Connectedness, 459
Conservation laws, 591
Constrained controllability, 117
Constrained extremum problems, 93
Contingent equations, 555
Contraction mappings, 485
Control parameters, 317, 323
Control theory, 317, 323, 469
Convergence rates, 11
Convex cones, 585
Convex programming, 161
Counterexample, 125
Cutting plates, 195

Davidon projections, 507
Decentralized control, 289
Decomposition and coordination, 229
Decomposition techniques, 181
Differential games, 469
Direct methods, 83
Discounted two-person zero-sum stochastic games, 125
Discrimination of stationary points, 33
Disjunctive constraints, 195
Distributed control problems, 563
Distributed-parameter systems, 415
Dogleg algorithm, 507
Duality, 349
Dyamic programming, 125

Existence theorems, 57, 555
Extremal controls, 105

Faithfully convex functions, 451
Feasible directions, 161
Filtering and control, 247
Flexible systems, 415
Fractional programming, 349
Frechet derivatives, 585
Frechet differentiability, 549
Function minimization, 335
Functional analysis, 375

Games, 263
Game theory, 485
General multiplier rule, 93
Generalized inverse, 311
Generalized Lagrangian, 181

0022-3239/78/0800-0607$05.00/0 © 1978 Plenum Publishing Corporation

Geometric programming, 307
Goal programming, 361
Gradient, 451
Gradient methods, 1, 311

Hilbert spaces, 263, 549
Homogeneous programming, 349

Implicit function theorem, 575
Improvement of convergence, 229
Inequality constraints, 383
Infimal convolution, 579
Information structures, 139
Information values, 139
Informational efficiency, 247
Integer programming, 195
Integral equations, 49
Isoperimetric problems, 317, 323

Kalman–Bucy filter, 247
Kalman filter, 591

Lagrange multiplier rule, 93
Lagrange multipliers, 219, 375
Lagrange problems, 83
Large-scale systems, 139
Large-system optimization, 181
LDL′ decomposition, 507
Least-square solution, 311
Level sets, 579
Level sets compactness, 83
Linear autonomous control systems, 105
Linear filtering theory, 591
Local-global property, 579

Majorization, 361
Markov chains, 289
Mathematical programming, 263, 361, 375, 383
Maximum principle, 317, 323, 519
Mechanical engineering, 307
Method of multipliers, 181
Modification of performance index, 229
Multicriteria optimization, 459, 469
Multimodal functions, 33
Multiplier methods, 443
Multistage allocation, 33

Nearly-optimal strategies, 125
Necessary conditions, 519
Newton–Raphson method, 219
Newton's method, 443
Nondifferentiable optimization, 437
Nondominated outcomes, 459
Nonlinear approximation, 335
Nonlinear constraints, 335
Nonlinear dynamic systems, 219
Nonlinear evolution equations, 57
Nonlinear large systems, 229
Nonlinear operators, 549
Nonlinear programming, 383, 407, 437, 575
Nonlinear systems, 519
Numerical methods, 335

Objective functions, 383
Optimal control, 57, 93, 229, 549
Optimal control algorithms, 407
Optimal design, 307
Optimal inputs, 219
Optimality, 161
Optimization, 1
Optimization theorems, 519

Parametric imbedding, 49
Pareto optimality, 469

Partial differential equations, 263, 415, 563
Polyhedral annexation, 195
Polyhedral restraints, 105

Quadratic convergence, 443
Quadratic decision problems, 139

Reflexive Banach spaces, 57

Semicontinuity, 83
Sensitivity analysis, 407
Sequential computation, 207
Set-valued map, 57
Simultaneous computation, 207
Slater regularity condition, 375
Source of multimodality, 33
Spring optimization, 307
Stability, 485
Steepest-ascent algorithm, 437
Stiff equations, 207
Stochastic control problems, 289
Subgradient search, 437
Subspace exit, 105
Sufficient conditions, 83
Switching-time location, 407
System identification, 219

Tangent cones, 585
Team decision problems, 139
Terminal constraints, 317, 323
Terminal control, 57
Time-optimal control, 57, 563
Two-armed bandit problem, 247
Two-point boundary-value problems, 207

Unconstrained minimization, 1
Unconstrained optimization, 11, 507
Upperhemicontinuous set-valued maps, 459

Variational problems, 49
Velocity field, 57

Weak Cesari property, 57
